

Jim Jaeger

Director, DoD & Commercial Cyber Systems

Jim Jaeger is responsible for managing the DoD & Commercial Cyber Systems business area at General Dynamics Advanced Information Systems (GDAIS), including the General Dynamics Digital Forensics Lab. Jim is the Director for a wide range of offensive and defensive cyber programs including our support for the DoD Cyber Crime Center (DC3) where we conduct forensic examinations for the Defense Computer Forensic Lab and perform research, development, test and evaluation the Defense Cyber Crime Institute. Previously, Jim created our information assurance and critical infrastructure protection group, which has developed a wide variety of Information Assurance tools, ranging from the Air Force's intrusion detection infrastructure to the only network based multi-level security (MLS) system accredited by the National

Security Agency at Protection Level 4 without waivers. Over the past several years Jim has led forensic investigations into some of the biggest network breaches impacting United States commercial firms.

Jim is a former Brigadier General in the United States Air Force. His military service includes stints as the Director of Intelligence (J2) for the U.S. Atlantic Command, Assistant Deputy Director of Operations at the National Security Agency, and Commander of the Air Force Technical Applications Center. In these capacities, Jim was responsible for the collection and reporting of intelligence to Theater Commanders and the National Command Authority.

Jim received his Bachelor of Science degree from the Air Force Academy and his Master's degree in Management & Supervision from Central Michigan University. He also completed the Executive Development Program at the Whitmore Graduate School of Business of the University of New Hampshire.
