

**Masters Leadership Program
Technology Day Agenda
Wednesday, February 8, 2012**

Board Hosts: Stephanie Chandler & Dean Mauli Agrawal, Ph.D.

Emergency Numbers: 259-9867

Class Day Objectives:

- *Provide class members an awareness of the pervasive interaction of technological innovation and education on our community's economy, entrepreneurial activities, and worldwide competitive advantage.*
- *Explore the wide-ranging needs in our community and nation in maintaining (or in some cases re-achieving) technological preeminence. This will be aided by being made aware of the significant research efforts undertaken daily at the Southwest Research Institute(SwRI), a premier, if not advertised, jewel in US research efforts and providing interaction with key innovators, entrepreneurs and educators who are having significant impact on technology business development.*
- *Although the goal of Technology Day is more focused on providing the class exposure to the above themes rather than providing ideas/opportunities for traditional volunteerism, the class will also receive information about ways they can give back in traditional and non-traditional ways to San Antonio's technology advancement.*

7:15a Arrive by private vehicles at the McNay Art Museum, 6000 N. New Braunfels

7:30a Bus Departs for Southwest Research Institute (SwRI), 6220 Culebra Rd., Bldg 189, Video Conferencing Room
